Kevin Kennedy  
Project Manager  
California Energy Commission  
1516 9<sup>th</sup> Street, MS 3000  
Sacramento, CA 95814-5512

Mr. Kennedy:

I am writing to clarify a few points as they relate to our two applications for certification currently under your review. The attached sheets contain, in further detail, the in plant piping of the gas supply to each gas turbine as request for section 1.2 for both sites and the estimated workforce requirements and explanation relating to section 3.2 of both applications. We would like to further clarify that it is SoCal's intent to hang the gas line under the Mt. Vernon bridge for the gas line extension to the Century substation. Also included is a revised site map for section 7 identifying ammonia storage, and transfer facilities. Discussions between SoCal Gas, the San Bernardino County Flood Control District, and the City of Colton occurred on Monday, April 2 regarding this issue. It is also our intent to use the paved and curbed areas on Slover and Pepper streets for all parking during the construction phase at the Drews substation as recommend by the Colton Police Dept. We will park as indicated in our application for the Century substation and may also lease additional land adjacent to the Century substation for additional parking area during the construction phase at that substation. Additional land east of the Century substation will be leased for equipment lay down for both construction sites. We will bring material to the Drews substation as needed daily to minimize the impact to the surrounding areas. Should you require further clarification, please do not hesitate to contact me at 661-836-3035.

Sincerely,

Matt Olson
